American Samoa Power Authority (ASPA) entered a Power Purchase Agreement (PPA) in June 2014 for a Waste to Energy Facility utilizing Pyrolysis technology in American Samoa. Mr. Utu Malae, Executive Director of ASPA, his business partner, and the technology vendor will be present at this meeting to provide a briefing on the technology and details of the PPA. This meeting is generally for informational and scoping purposes with the intent for USEPA-R9 to assist ASPA in the identification of most likely applicable Federal regulations, associated permitting requirements, and time required for this process.

ASPA has agreed to provide a written briefing in advance to enable USEPA to better prepare for this meeting.
